PROFESSIONAL SUMMARY

Certified IBM SkillsBuild Cybersecurity Analyst pursuing a Bachelor of Science in Computer Science at the University of the People, with hands-on experience in risk assessment, security policy development, and enterprise security improvement planning. Focused on Governance, Risk & Compliance (GRC) — risk identification, impact analysis, and control frameworks aligned with NIST principles. Available for remote, hybrid, or on-site entry-level GRC/Risk Analyst positions.

CORE SKILLS

Security Risk Assessment • Risk Tolerance & Impact Analysis • Governance, Risk & Compliance (GRC) • NIST Risk Framework Alignment • Security Policy Development • Administrative & Physical Security Controls • Backup & Recovery Planning (3-2-1 Rule) • Cybersecurity Documentation • Analytical Thinking • Communication • Attention to Detail

TECHNICAL TOOLS

Git & GitHub • Microsoft Word • Microsoft Excel • Windows Security • Linux • Splunk • Google Docs • Canva

Currently building: SOC Level 1 fundamentals (TryHackMe), MITRE ATT&CK framework

AI Literacy: Practical understanding of generative AI capabilities, prompting, and responsible/ethical use (Accenture, 2026)

CYBERSECURITY PORTFOLIO PROJECTS

IBM SkillsBuild Cybersecurity Portfolio Program

Risk Assessment

- Identified and evaluated 8 risks (4 external: ransomware, DDoS, third-party compromise, natural disaster; 4 internal: phishing, weak passwords, device loss, insider threat) for a simulated 250-employee logistics company
- Assessed business impact and assigned risk tolerance ratings for each, supporting prioritized mitigation planning aligned with NIST risk management principles

Enterprise Cybersecurity Assessment & Improvement Plan (Capstone)

- Assessed security posture across 6 domains (OS security, firmware, risk management, physical security, administrative controls, backup planning) for a simulated 250-employee logistics company, identifying 6 major risk categories including ransomware, phishing, and unauthorized access
- Searched and analyzed logs in Splunk to support security assessment findings and threat identification
- Delivered a phased 90-day remediation roadmap with prioritized actions across three implementation stages

Administrative Control Plan

- Developed a cybersecurity awareness training program addressing phishing, social engineering, and human-error risk for a simulated 250-employee organization
- Designed onboarding and quarterly refresher training covering 8 core topics, plus a multi-channel communication strategy, informed by phishing-awareness training (Accenture)

Additional Projects

Operating System Security Assessment, Physical Security Control Plan, Backup & Recovery Plan, Security Firmware Plan — full documentation available on GitHub: github.com/danieltetenu-sec

CERTIFICATIONS

- IBM SkillsBuild Certified Cybersecurity Analyst (2026)
- IBM: Governance, Risk, Compliance and Data Privacy (2026)
- IBM: Vulnerability Management (2026)
- IBM: System and Network Security (2026)
- Additional IBM SkillsBuild badges (6+) — Credly

EDUCATION

BSc Computer Science (In Progress) | *University of the People*

Senior Secondary School Certificate Examination (SSCE) | *National Examinations Council (NECO), 2008*

LANGUAGES

English (Fluent)
