---

## PROFESSIONAL SUMMARY

Certified IBM SkillsBuild Cybersecurity Analyst pursuing a Bachelor of Science in Computer Science at the University of the People, with hands-on experience in operating system security, firmware protection, and IT security fundamentals. Combines a practical, troubleshooting-oriented approach with growing cybersecurity expertise — well-suited for an IT Support role with a security specialization path. Available for remote, hybrid, or on-site roles.

## CORE SKILLS

Operating System Security • Firmware & Device Security • Network Security Fundamentals • Security Policy Development • Vulnerability Assessment • Backup & Recovery Planning (3-2-1 Rule) • Identity & Access Management (IAM) • Cybersecurity Documentation • Problem Solving • Communication • Attention to Detail

## TECHNICAL TOOLS

Git & GitHub • Windows Security • Linux • Nmap • Splunk • Microsoft Word • Microsoft Excel • Google Docs • Canva

Currently building: SOC Level 1 skills (TryHackMe), MITRE ATT&CK framework

AI Literacy: Practical understanding of generative AI capabilities, prompting, and responsible/ethical use (Accenture, 2026)

## CYBERSECURITY PORTFOLIO PROJECTS

*IBM SkillsBuild Cybersecurity Portfolio Program*

### Operating System Security Assessment

- Evaluated 5 core OS security domains — patch management, port/device exposure, event logging, authentication controls, and backup readiness
- Produced a security hardening plan with actionable recommendations to reduce attack surface and strengthen monitoring

### Security Firmware Plan

- Assessed firmware security across network and mobile devices, identifying 3 key vulnerability categories: outdated firmware, default credentials, and unverified firmware sources
- Developed a personal firmware security plan with monthly update checks and manufacturer-verified sourcing to reduce attack surface

### Enterprise Cybersecurity Assessment & Improvement Plan (Capstone)

- Assessed security posture across 6 domains (OS security, firmware, risk management, physical security, administrative controls, backup planning) for a simulated 250-employee logistics company, identifying 6 major risk categories including ransomware, phishing, and unauthorized access
- Searched and analyzed logs in Splunk to support security assessment findings and threat identification
- Delivered a phased 90-day remediation roadmap with prioritized actions across three implementation stages

### Additional Projects

*Risk Assessment, Physical Security Control Plan, Administrative Control Plan, Backup & Recovery Plan — full documentation available on GitHub: [github.com/danieltetenu-sec](https://github.com/danieltetenu-sec)*

## CERTIFICATIONS

- IBM SkillsBuild Certified Cybersecurity Analyst (2026)
- IBM SkillsBuild Digital Badges (6+) — Credly
- Accenture Learning to Earning Professional Development Certificates (7+)

## EDUCATION

**BSc Computer Science (In Progress)** | *University of the People*

**Senior Secondary School Certificate Examination (SSCE)** | *National Examinations Council (NECO), 2008*

## LANGUAGES

English (Fluent)
